VS-350B  
VS-550B  
EVS-349B  
EVS-350B  
EVS-550B**

### Column

The heavy one-piece base and column is a thick walled Meehanite casting that is fully cross-ribbed for strength and rigidity. The built-in coolant tank is another added value feature of the heavy duty base and column.

### Knee and table assembly

The oversized knee, with its large ratio of length to width, provides extra support for the table and saddle for large workpieces and heavy cuts. The precision ground table is provided with three T-slots for easy workpiece clamping.

The rugged **Summit V-Series** vertical mills have been engineered and manufactured from the finest components with the operator in mind. All the controls are centralized for ease of operation in either hand or power feed mode. Movement of the head to various angles is easily obtained from the operator's position.

Available in six models to give you the choice that fits your machining requirements the best. The **V-242B**, a two horsepower, step pulley model for the budget minded; the **VS-350B**, a three horsepower model with standard variable speed that is a real workhorse; the **EVS-349B** and **EVS-350B** are three horsepower models with Electronic Variable Speed for the utmost control; the **VS-550B**, a massive five horsepower model with standard variable speed or the top of the line **EVS550B**, five horsepower Electronic Variable Speed model that provides instant speed control coupled with the brute strength and stability for heavy cuts and fine finishes in all types of materials.

### INCLUDED ACCESSORIES

- Oil gun
- Screw drivers
- Way covers
- Clamping kit
- Box end wrench set
- (6) R-8 collets (V242B, VS350B, EVS349B & EVS350B)
- Halogen work light
- Built-in coolant system
- Dual voltage 220/440
- Open end wrench set
- Hex key wrench set

### OPTIONAL EQUIPMENT

- 2 axis electronic digital readouts (X & Y)
- 3 axis electronic digital readouts (X, Y, knee or quill)
- Longitudinal (X-axis) power feed
- Cross (Y-axis) power feed
- Knee (Z-axis) power feed (V242B, VS350B, EVS349B & EVS350B)
- Power draw bar (V242B, VS350B, EVS349B & EVS350B)
- 40 taper end mill holders (VS550B & EVS550B)
- Drill chuck with arbor
- Milling machine vise
- 12" rotary table
- 6" riser block

# Standard Features

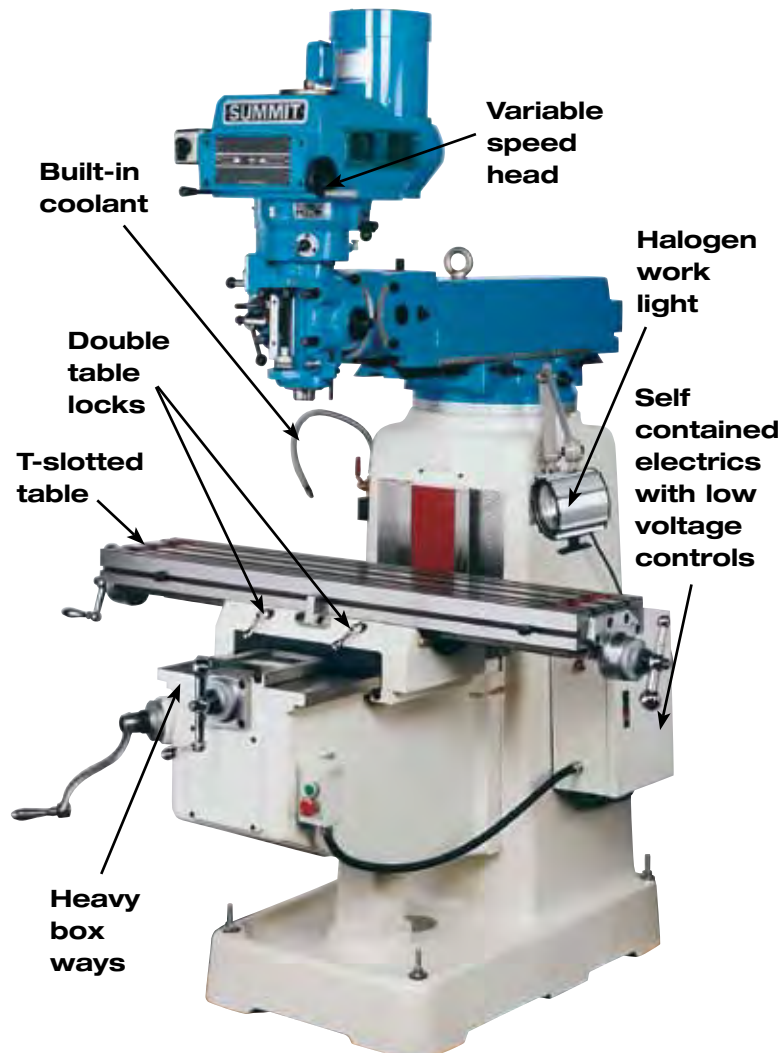

## V-242B STEP PULLEY

- Heavy Meehanite cast construction
- Double table locks
- Way wipers for saddle & column
- Hardened & ground ways
- Hand & power spindle feeds
- Tilting and rotating head
- One-shot lubrication
- Low voltage controls
- Step pulley head
- Dovetail ways

## VS-350B STANDARD VARIABLE SPEED

- Heavy Meehanite cast construction
- Heavy box saddle
- Huge box type ways on knee
- Double table locks
- Way wipers for saddle and column
- Hardened and ground ways
- Hand and power spindle feeds
- Tilting and rotating head
- One-shot lubrication
- Adjustable cross slide stops
- Low voltage controls
- Variable speed head

## VS-550B STANDARD VARIABLE SPEED

- Heavy Meehanite cast construction
- Double table locks
- Heavy box ways on the saddle, knee and column
- Hardened and ground ways
- Hand and power spindle feeds
- Rotating, variable speed head
- Power draw bar
- One-shot lubrication
- Complete electrics with low voltage controls
- Powered knee

## EVS-349B ELECTRONIC VARIABLE SPEED

- Full 3HP with electronic variable speed
- Can be setup for 220v single or three phase
- No extra cost for 440v three phase
- Meehanite® castings
- Hardened and ground ways with Turcite® liners
- 9"x49" table
- Includes: coolant system, halogen worklight, complete electrics, clamp kit and collets

## EVS-350B & EVS-550B ELECTRONIC VARIABLE SPEED

- Inverter Duty, High Energy - High Efficiency Motors for lower utility costs, save up to 35%
- Fewer moving parts in the head for less maintenance and down time
- Cogged drive belt to prevent belt slippage and extend tool life
- Centrally located controls for ease of operation
- Immediate response speed control (0-full speed in 4 sec.)
- Full range RPM selection. Tweak up or down to prevent chatter and prolong tool life
- Electronic Inverter controlled braking for reduced set-up time
- "Turcite-B" inserted guideways for extended machine life
- Complete electrics with low voltage controls for safer machine operation
- Yaskawa compact AC inverter drive
- Fan cooled electrical enclosure
- Heavy "Meehanite®" cast iron construction for excellent damping
- Huge box ways on knee
- Powered knee (EVS550B)
- One shot lubrication
- Power draw bar (EVS550B)
